

# THE BREVARIUM

*By Swizel*

“

Education has never  
been easier and smarter

>> PROJECT APPMAN

A vertical photograph of a yellow door with a mural. The mural depicts two hands, one from the left and one from the right, holding a large, black, stylized letter 'S'. Below the 'S', a large, black, stylized letter 'U' is visible. The door is set against a white brick wall. The image is framed by a light blue circular graphic element at the top and bottom.

# WHO WE ARE

Swizel is a dynamic I.T solutions company, with its primary emphasis on harnessing web technologies to deliver web and mobile solutions that aim at improving the way of life and ease of doing business across all sectors of human life, the educational sector being a crucial part.

We take pride in our Innovative Products, Client centric culture, and Timely Delivery of smart solutions.

## OUR SERVICES

- ✔ Software Development
- ✔ I.T Support
- ✔ Data Analysis and Management
- ✔ Digital Marketing
- ✔ Networking
- ✔ I.T Consultations.

# THE PROBLEM

The all round management of a school can be hectic and inefficient even for the most skilled and qualified administrators and school staff. The orthodox method is typically difficult, full of gaps in the analytical process of evaluation, result tracking and staff-student relationships.

It has become important for schools to properly store and manage data e.g biodata, financial receipts and statements, statistical analysis, tests and exam results, certificates, transcripts, and much more.

# THE SOLUTION

---

## Project Appman

AppMan is an efficient, effective and easy to use, all round school management system, built to help in the continuous drive to further the educational standard in Africa.

It is a product of international standard, with the most up-to-date technologies, but also flexible, and customizable enough to meet the specific needs of institutions on every tier of education.

## Features of Appman

- MyAppman School Management Web and Mobile App.
- MyAppman Attendance Web and Mobile App.
- MyAppman CBT Web and Mobile App.

## MyAppman School Management Web and Mobile App

---

A well-organized database of every staff, student, parents and other relevant persons, retrievable upon search.

Real time updates on happenings in school, including but not limited to; pre-programmed information, news updates, announcements etc. which can also reach parents and guardians if needed.

Offline messages and notifications can be sent to staff, students or any relevant persons in the event of limited or no access to internet connection.

Scheduling of tests and exam time tables

Viewing and tracking of individual data (including but not limited to test and exam results, session cards and other personal data) confidentially or publicly as per demand, becomes convenient.

Payment is made easier and more efficient by an in-app payment feature. E-receipt will be generated for any party involved as proof of payment for record purposes.

Online course registration, exam and test candidates verification using biometrics and/or smart cards.

Online Lectures/e-learning

## MyAppman Attendance Web and Mobile App.

---

01

The software generates a QR code for each and every student of the institution; this code will be used to create a unique smart ID card for each student, so that by scanning this unique ID using MyAppMan Attendance, the necessary information of the student, the attendance and exam qualification of the student etc. can be easily obtained.

02

The software takes attendance during lectures by scanning the unique QR codes on the Smart ID's of each student. It immediately stores this in the secure database both on and offline, against the student's profile. This attendance information is used to compute a student's overall attendance percentage for each and every course of study in a scenario where a student must make a given percentage for example 75% to Qualify him or her to write the end of semester exam. The software seamlessly does this computation and hence eliminating human error and examination misconduct.

03

The software also takes the examination day attendance; it utilizes the information on the attendance database of every student over the semester to determine if a student is qualified to write a particular exam or not.

## MyAppman CBT Web and Mobile App.

---

**01**

The software provides the student with an easy to use computer based testing platform for study sections in line with the school's timetable.

**02**

The software simulates exam practice sessions with appropriate timing and immediate grading, to get the student well acquainted with the operational processes during a Computer Based Test.

**03**

The software works with the academic staff of the school to set up a standard computer based test for each and every student of the school.

**04**

The software provides a moderated chat forum for online study sessions, Q & A and revisions on each course.

**05**

A web CBT software for real-time tests and exams available in web version.

## WHY DO YOU NEED APPMAN

1. Personalized  
User Experience

2. Convenient and  
Traceable payment  
processes

3. Efficient staff and  
student  
management

4. Easy and  
accurate data  
storage

5. Data security

6. Revenue  
Generation

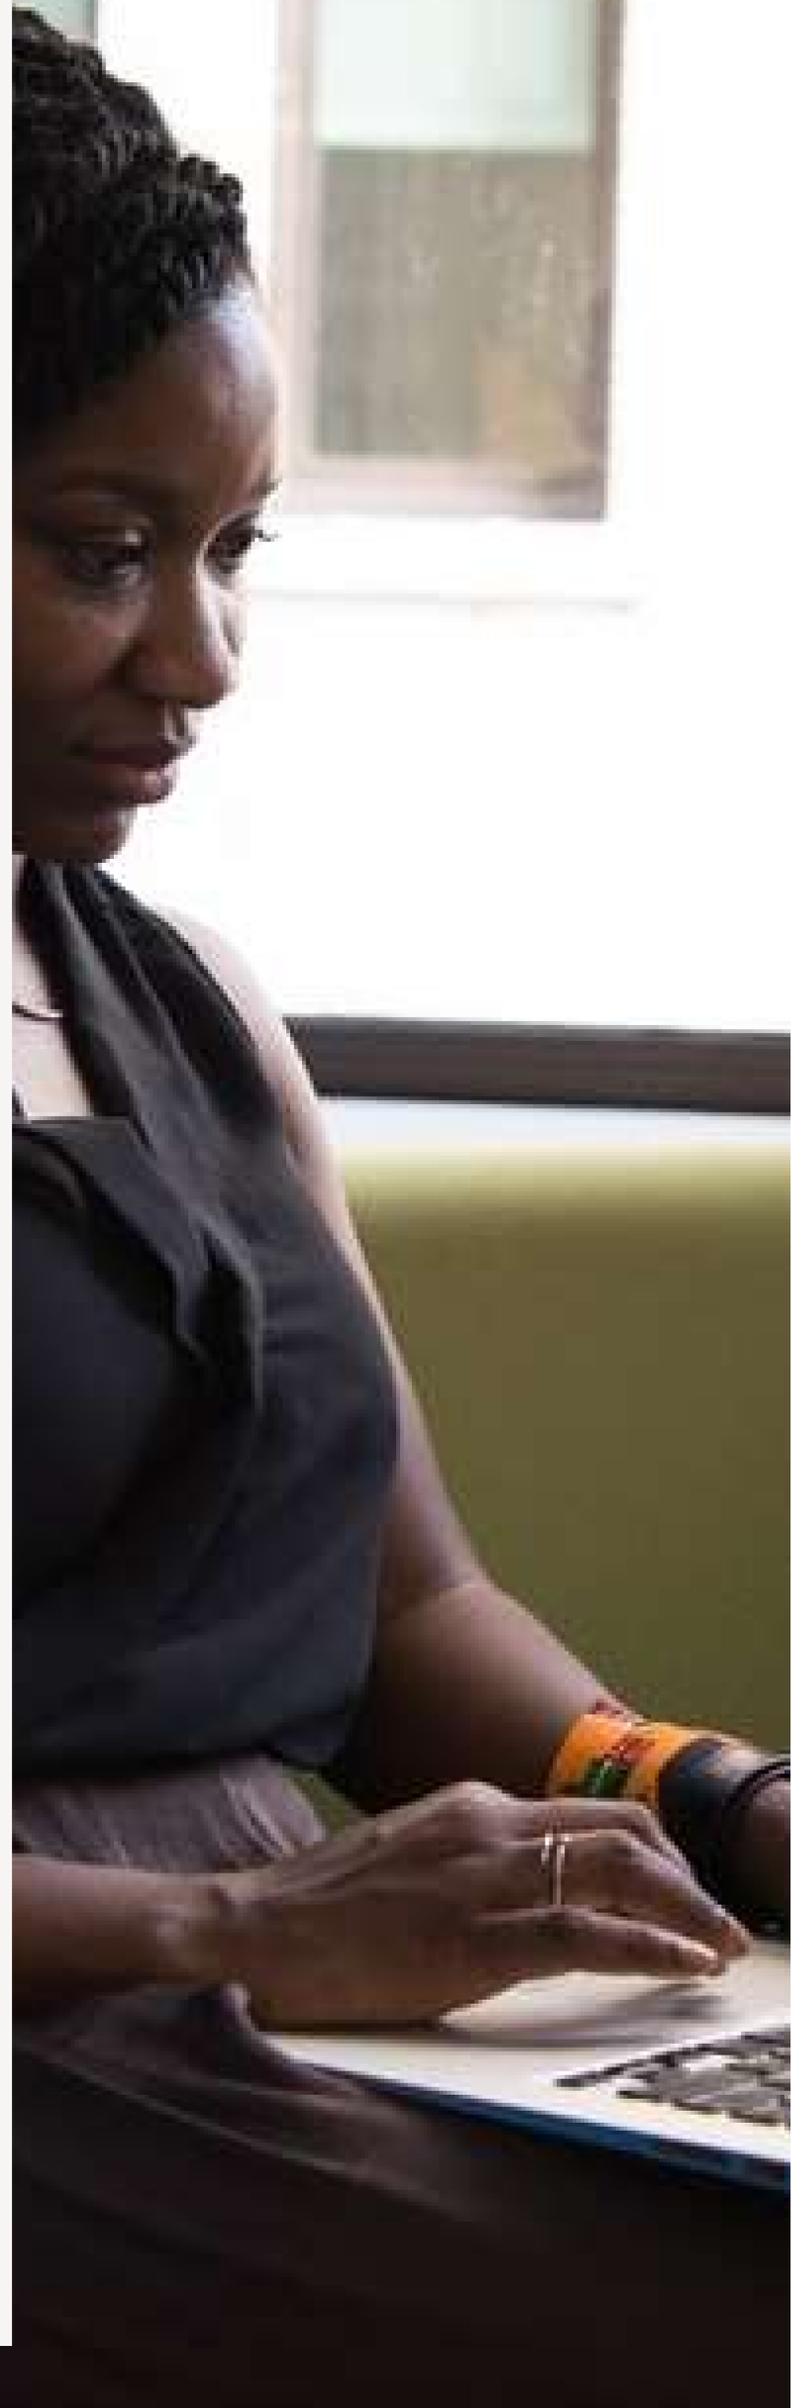

7. A higher ICT  
ranking on  
Webometrics

# We have a portal

## Do we still need Appman?

Appman creates a personalised experience for the user. Routine academic processes like registration and result checking become very easy, Appman's availability on any mobile phone removes the hassle of going to a cybercafe. This makes Appman more convenient and user friendly when compared to a web portal.

A website is your school's image to the world. Appman polishes that image and makes the world fall in love with your school's efficiency and initiative all while solving day to day problems and tasks.

# Our Process

Using the most up-to-date technologies to target all platforms (web, mobile etc)

## 1. Build

We utilize the most up-to-date resources to create unique and globally competitive products.

## 2. Integrate

Our different products are built with a focus on optimal problem solving and an ability to seamlessly interact with standard tech facilities and softwares in the market.

## 3. Deploy

Our efficient systems and highly skilled and qualified professionals enable us to install and deliver our products and services.
